

WORKSHOP FOR WIDENING PARTICIPATION IN FACCE-JPI

November 30th, 2021
From 14:30 to 17:00 CET

Agriculture Food Security and Climate Change

Draft AGENDA

Webinar

The objective of this workshop is to bring together three groups of key governmental-level stakeholders per country in a closed workshop to discuss a better engagement of the EU13 in the activities of the Joint Programming Initiative for Agriculture, Food Security and Climate Change (FACCE-JPI). These are:

- Representatives from research funding bodies: e.g. research ministries, councils, or national research offices responsible for funding research in the respective countries.
- Representatives from a ministry dealing with related policies, in most of the cases this would mean a representative from ministries of agriculture in the EU13 countries.
- Representatives from research institutes that are already members of FACCE-JPI.

The ultimate aim is to help the Governing Board members from these countries in their national activities and to help promote national-level network building (FACCE-JPI mirror groups) that gather policy makers and research funders. In countries that are not yet part of FACCE-JPI, we aim to identify and engage a new representative.

Expected outcomes:

1. First-hand update on FACCE-JPI, better national coordination within the science-policy ecosystem
2. Boosting the representation, and where necessary (re)nomination of a member in the FACCE-JPI Governing Board on behalf of the country
3. Engagement of national stakeholders into international networks, activities and projects, especially in the context of Horizon Europe: (CSAs, Partnerships etc.)
