

Crisalyde partnership pitch

Date de création	20260518	Statut
Rédacteur	Clément JUDEK	Terminé

- I offer my expertise to participate as a Partner in a Horizon Europe project
 I am planning to coordinate a project and I am looking for project partners

Call:

HORIZON-CL3-2026-01-INFRA-01: Tools and processes to support stress tests of critical infrastructure
--

Information about the organisation

<i>Organisation</i>	Crisalyde
<i>Presentation</i>	Crisalyde is a consulting firm specialised in crisis management, business continuity and organisational resilience. The company supports public and private organisations across multiple sectors, including critical infrastructures, healthcare and public services. Crisalyde combines extensive operational experience with a strong R&I approach, leveraging immersive crisis simulations to analyse decision-making, human factors and organisational performance.
<i>Address</i>	140, rue Jean Lolive – 93500 Pantin - FRANCE
<i>Type of partner</i>	SME
<i>Website</i>	https://crisalyde.fr

Experience of Crisalyde in EU projects

Experience in EU projects	No formal participation yet at organisational level. However, Crisalyde benefits from team members with prior individual experience in European projects and has been actively involved in French research projects and collaborative R&I initiatives.
---------------------------	--

Potential role in a project

General	<p>Crisalyde can be involved as a WP or Task leader, not as a project coordinator. Crisalyde would act as a specialised partner for stress-testing design, crisis simulation and exercise-based validation, contributing to the development, implementation and operationalisation of methodologies supporting the resilience of critical infrastructures.</p> <p>Crisalyde brings a combination of operational expertise and research-oriented methodologies, including:</p> <ul style="list-style-type: none"> • large-scale experience in immersive crisis simulations (>200 exercises per year) • ability to create controlled yet realistic environments for testing and evaluation • expertise in human factors, decision-making analysis and organisational performance under stress • capacity to link technical validation with behavioural and operational dimensions
---------	--

	This positioning strengthens the consortium's ability to deliver credible, validated and usable results, which is a key success factor for INFRA-01 projects.
<i>Contribution to call expectations</i>	
<i>Improving stress-testing methodologies and processes</i>	<p>Crisalyde contributes by designing and implementing realistic crisis simulation environments that enable the testing of critical infrastructures under complex and dynamic conditions.</p> <p>These simulations integrate technical disruptions with organisational and human responses, allowing the project to develop and validate advanced stress-testing methodologies grounded in real operational contexts.</p>
<i>Enhancing crisis management and operational procedures</i>	<p>Crisalyde enables the evaluation and improvement of crisis management procedures by observing and analysing:</p> <ul style="list-style-type: none"> • decision-making processes under pressure • coordination between multiple stakeholders • operational responses across organisations <p>Through immersive and instrumented exercises, Crisalyde provides evidence-based insights to strengthen procedures, improve coordination mechanisms and enhance overall resilience.</p>
<i>Strengthening training, preparedness and capacity building</i>	<p>Crisalyde supports the development of training and preparedness programmes directly linked to project outcomes.</p> <p>By leveraging realistic exercises and structured feedback mechanisms, Crisalyde ensures that:</p> <ul style="list-style-type: none"> • stakeholders acquire practical and transferable skills • solutions developed in the project are operationally adoptable • end-users are actively involved in validation and uptake processes <p>This contribution directly supports the expected impact of Horizon Europe projects by facilitating real-world implementation and long-term adoption.</p>
